

REMARKS

Entry of the amendments to, and allowance of the pending claims in this application is respectfully requested in view of the following remarks.

Claim 46 has been amended and new Claims 47-57 added. It is believed that Claim 46 is patentable for at least the same reasons as set forth in Applicants' December 10, 2004 Amendment.

New independent Claim 56 is also patentable, at least because the art of record does not teach or suggest a method of measuring blood pressure of a user using a wrist sphygmomanometer, including the steps of fitting the wrist sphygmomanometer on the user's wrist including locating the body on a thumb side of the user's arm, and prompting the user to adopt an appropriate measuring position by displaying a visual signal on the display that guides the user to an appropriate measuring position.

Support for the amendments to Claim 46, new dependent Claims 47-54, dependent from Claim 46, and new Claims 56 and 57 may be found at pages 12, line 16 through page 13, line 15 of the application. No new matter was entered by these amendments.

Applicant asks that all claims be examined in view of the amendment to the claims.
